

ItemTracker Infinity.

The Complete Sample Management Solution.

ItemTracker is a complete laboratory sample management software solution which visually manages your samples, sample sources and storage area. ItemTracker does everything you would expect including full auditing, bar coding, sample scanning and much more.

ItemTracker automatically assigns a unique identifier to each sample, providing traceability and the ability to demonstrate consent where applicable.

Ancestry Made Easy

Maintain a complete history of your samples and the ancestry through to child samples and aliquots over multiple generations if applicable.

Elementary Import and Export

Import complete records directly from Microsoft Excel. Exports complete records at the touch of a button.

Integrated Auditing

Demonstrate a clear audit trail for your samples at the click of a button.

Web-Enabled App

Easy remote installation and system updates across your site. View the program in your web browser. Secure system; manage user group privileges with ease.

Highly Configurable.

No two customers are the same. As such, ItemTracker offers infinite configurability to perfectly match your lab, your workflow and your requirements. This allows you to spend less time managing users and more time on the science.

Visualise Your Storage

ItemTracker maps your storage so you can visually track your samples. Save valuable time by easily retrieving items and their location in an instant.

Full Barcode Intergration

Scan and store your samples. A number of functions are integrated to allow you to perform actions simply by scanning an items barcode.

Manage Group Privileges

Assign privileges and set team leaders. Users will only have access to the samples, storage and functionality you wish them to.

Dynamic Display

See your items mapped visually. The items window intuitively displays the boxes you're viewing.

Powerful Searching

ItemTracker provides full searching of both samples and their owners (sources). You can search and then print out fully customised reports showing only the information that you are interested in.
